ABOUT ME

Motivated Computer Science undergraduate with hands-on experience in **Software Development, Data Science** and **Machine Learning**. Passionate about developing full-stack applications and data-driven solutions. Strong problem-solving skills, teamwork, and the ability to deliver projects efficiently. Seeking opportunities to apply technical expertise in real-world projects while continuously learning and improving.

EDUCATION

Bachelor of Science - BSc(Hons) in Computer Science

University of Kelaniya, Sri Lanka

Computer Science Specialization with Data Science - **Current GPA - 3.95**

Advanced Level (G.C.E)-2021

Physical Science Stream - **Z Score 1.5841**

TECHNICAL SKILLS

Languages: Java | Python | C# | C | JavaScript | HTML | CSS

Frameworks: React JS | Node JS | Next JS | Spring Boot | Tailwind | Bootstrap | Flask

Databases: MySQL | PostgreSQL

Tools: Github | Postman | Docker

Concepts: Object Oriented Programming | Data Structures | Machine Learning

SOFT SKILLS

- Critical Thinking
- Problem Solving
- Communication
- Leadership
- Team Player

PROJECTS

Socialite – Spring Boot Social Media App

Technologies: **Java 21, Spring Boot, PostgreSQL, Thymeleaf, Tailwind CSS**

Description: A lightweight social media web application

Key Features:

- Secure user authentication and session management using Spring Security and BCrypt.
- Create, view, and like text-only posts.
- Send, accept, and decline friend requests.
- Implemented MVC architecture with SOLID and OOP principles.
- Used GitHub collaboration workflow with protected branches and peer-reviewed pull requests.

Human Resource Management System

Technologies: **C#, .NET Framework, Windows Forms, SQL Server**

Description: A desktop-based HR management application developed to simplify HR operations and improve data handling.

Key Features:

- User authentication for Admins, Managers, and Employees.
- Manage employee records, departments, and leave requests.
- Role-based access control and search functionality.
- SQL Server database integration for reliable data storage.

[!\[\]\(3211b5d1d968fc1665909b34f9f16010_img.jpg\) **GitHub Repository**](#)

CKD Prediction System

Technologies: **Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn**

Description: This project predicts whether a person has Chronic Kidney Disease (CKD) using medical test results. It uses machine learning to give a prediction and help with early detection.

Key Features:

- Cleaned the data and fixed missing values.
- Converted text data into numbers.
- Used models like Logistic Regression, Decision Tree, and Random Forest.
- Checked how well the models work using accuracy and other scores.
- Drew graphs to understand the data better.
- Compared models to choose the best one.
